Note :

① Inspeksi Foregoing ini hanya dikerjakan saat (Tulis Pemeriksaan yang dikerjakan) =

1. StartUp Inspeksi

2. Pergantian Material Lot Cap

3. Pergantian Electroda (Upper, Middle dan Lower Electroda)

4. Adjust Posisi Electroda

Bila ditemukan NG, Cek dan Adjust Kondisi Seal dan Posisi Electroda

② Tuliskan nilai dari pengukuran OffCenter dan StemSize.
($r \leq 50\mu m$), (StemSize (s) = 5.575 - 5.600mm)

③ Isi kolom X dan Y dengan Nilai GAP antara X, Y cap dengan X, Y Stem
(Best Measurement Monitor)

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations

$$\frac{dx}{dt} = A(x)u, \quad \frac{dy}{dt} = B(x)y,$$

where $A(x)$ and $B(x)$ are matrices depending on x .

2. In the second part, we consider the case when the matrix $A(x)$ is constant.

3. In the third part, we consider the case when the matrix $B(x)$ is constant.

4. In the fourth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

5. In the fifth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

6. In the sixth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

7. In the seventh part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

8. In the eighth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

9. In the ninth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

10. In the tenth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

11. In the eleventh part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

12. In the twelfth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

13. In the thirteenth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

14. In the fourteenth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

15. In the fifteenth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

16. In the sixteenth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

17. In the seventeenth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

18. In the eighteenth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.

19. In the nineteenth part, we consider the case when the matrix $A(x)$ is constant and the matrix $B(x)$ is constant.
